The Scammell Pioneer was a British 6x4 tractor used in the Second World War as an artillery tractor, recovery vehicle and tank transporter. Pioneers purchased by the British Army were equipped with a 102 bhp Gardner 6 cylinder diesel engine. The production of the tank transporter begun in 1937, although the prototype had been built already in 1932. The tractor was equipped with a longer chassis and extended cab to accommodate the tank crew as passengers, and larger rear wheels than the Artillery tractor and Recovery vehicle variants. Initial 20 ton Pioneer TRCU20 trailer, then 30 ton Pioneer TRMU30/TRCU30 tractor and trailer combinations were delivered, in both cases with the trailer fixed to the tractor. Hinged ramps were used to get the tank onto the trailer, which could be pulled on with the tractor unit's winch (TRCU30 standard and late "Goose Neck" trailers), but the initial 20 ton trailer used system of jacks and removable rear bogies to load or unload tanks. Pioneer tractor/trailer combinations remained in production throughout the war, 459 units produced in total. Our special thanks to Henri Van Meel for his help with references.

TRCU30各トレーラーとそのトラクターTRMU30は各トレーラーとの組み合わせで供給されました。トレーラーとトラクターの結合は通常固定されていました。

戦車をトレーラーに上車するためのヒンジ可動のランプ（傾斜台）はトラクターに装着のウインチで引上げられました。

（ウインチはTRCU30型標準タイプ。アームタイプトレーラーに到着されていたもの）しかし初期型の20トントレーラーは戦車の昇降車時ジャッキを使い、

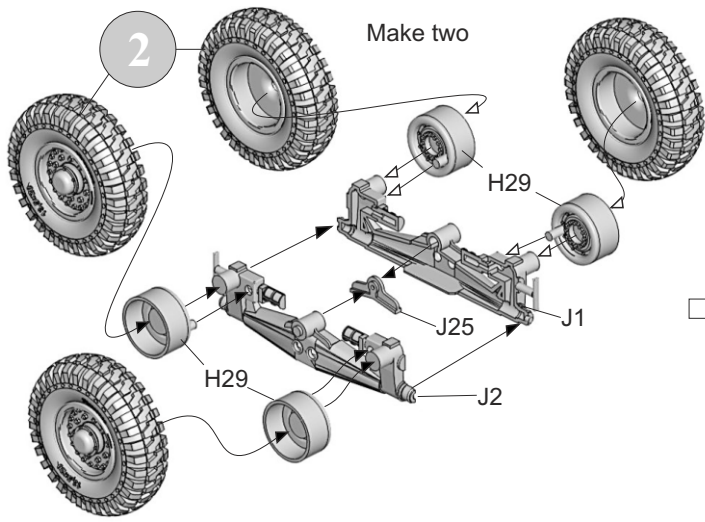

後部車台を外す仕様でした。パイオニア戦車運搬車ユニットは第二次大戦を通じて生産を継続され459両が生産されました。
